What this study is about

The purpose of this study is to understand how developers respond to design ideas for integrating multiple static analysis tools in a single interface.

Your participation in this study is voluntary

You can leave at any time without giving a reason.

Information I want to collect

I will ask you about how you feel with the design ideas shared. I will watch how you interact with prototype on a simple task i.e., walkthrough of different UI on fixing a bug and I will ask you some questions. I will record the session and I will take notes to record your comments and actions.

How I ensure your privacy

These recordings will be treated as confidential and will not be shared outside the concerned thesis research team.

I may publish research reports that include your comments and actions, but your data will be anonymous. This means your name and identity will not be linked in my research report to anything you say or do.

Your consent

Please sign this form showing that you consent to me collecting these data.

I give my consent

- I am at least 18 years old

- For the session to be recorded.

If you want to withdraw your consent in the future, contact me at below mentioned email address within two weeks and I will destroy any personal data I hold about you (such as the recordings). Otherwise, I will delete your personal data after two years.
